They enhance reliability by reducing stress and provide environmental protection. SMA boots improve durability and minimize damage at key connection points.

### Overview

The Custom SMA 905-5215 boot is a protective covering at the end of a Fiber Optic Connector that serves to secure and support the Fiber Optic Cable.

The Fiber Optic Boot protects the Fiber Optic Cable by ensuring proper bend radius and maintaining cable integrity.

The boot is a soft non-hygroscopic thermoplastic Vulcanizate (TVP) in the thermoplastic elastomer (TPE) family.

### Features & Benefits
