Choosing the Right Lamp(s)

UVCS series conveyors can be outfitted with either 5000-EC lamps or Fusion F300 lamps.

5000-EC Lamps

These lamps provide moderate intensity (~200 mW/cm²) over a 6" x 6" (approximate) curing area. Their 400-Watt auto-switching power supplies accept 90 to 264 Volts AC and 47 to 63 Hz. With normal use, 5000-EC bulbs will retain approximately 90% of their original intensity after 1,000 hours. 5000-EC lamps are recommended for small-to-medium throughput bonding applications. For faster or more tack-free cures, Fusion F300 lamps are recommended.

UVCS series conveyors can be outfitted with one, two, or four 5000-EC lamps as shown in the diagrams below.

Two 5000-EC lamps

Fusion F300 Lamps

These lamps provide the highest intensity (~2,500 mW/cm²) over a 1" x 6" curing area. Fusion F300 lamps require 220/230 Volts AC. With normal use, Fusion F300 lamps retain 80% of their intensity up to 5000 hours. Fusion F300 lamps are recommended for most coating, potting, and gasketing applications and all high throughput applications.

UVCS series conveyors can be outfitted with one or two Fusion F300 lamps as shown in the diagrams below.
