Foot Switch Setup Instructions

Introduction

The foot switch provides the operator the capability of initiating the cut cycle with a tap of the foot while both hands are busy. After installing the foot switch, the cut cycle is also able to be started with the red button on top of the fibersect panel as usual.

Foot Switch Setup

1. Place the foot switch in a location comfortable to the operator.
2. Route the foot switch cable to the connector on the right side of the fibersect.
