SMA Connector Boots

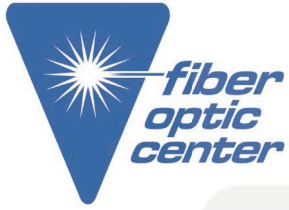

- Fiber Optic boots protect the Fiber Optic cable that comes out of a connector
- Offer mechanical connection via crimp-on or push-on force.
- Reduces strain at the fiber-connector entry, preventing excessive bend.

Features/Benefits

- Boots are usually shipped in bulk packing (100 per bag)
- Fiber optic boots prevent tight bends, relieve cable strain, and limit bending to avoid signal loss.
- Enhances reliability by reducing stress and providing environmental protection
- Improves durability, minimizing damage at key connection points.
- Color-coded for easy identification and to prevent misconnections.
- Offers vibration damping for protection against movement and shocks.
- Available in push-on or crimp-to-connector styles.
- Features trusted Amphenol quality with medical-grade material options.
- Custom boot colors available, with hardness measured on a durometer scale up to 100.
