Explosive Limits:	Lower: Unknown Upper: Unknown
Auto – Ignition Temperature:	Not determined
Hazardous Decomposition Products:	Carbon oxides

EXTINGUISHING MEDIA and FIRE FIGHTING INSTRUCTIONS

When sufficiently large quantities are present, firefighters should be equipped with full bunker gear, including a positive pressure, NIOSH approved, self-contained breathing apparatus. Fire-exposed containers may be cooled with water.

Unusual Fire and Explosion Hazards: High temperatures and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers. Avoid using a stream of water to control fires since frothing can occur.

Extinguishing Media: Use carbon dioxide, dry chemical, foam, or water spray

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Engineering / Ventilation Controls: General ventilation may be acceptable under most conditions, although local ventilation is required to control exposure whenever vapors, mists, or dusts are generated. Eye wash stations should be readily available.

Respiratory Protection: When exposed to aerosols or vapors, use full face organic vapor cartridge respirator with particulate pre-filter. In emergency situations, or when used in confined spaces, use self-contained breathing apparatus or other air supplied full-face respirator.

Skin Protection: Wear impervious, neoprene, gloves. Safety shower.

Eye Protection: Chemical splash goggles or full face shield. Eye wash stations.

9. STABILITY AND REACTIVITY

Chemical Stability: Unstable.

Conditions and Materials to Avoid: Polymerization initiators including peroxides, strong oxidizing agents, copper, copper alloys, carbon steel, iron, rust and strong bases. Also avoid heat, oxidizing conditions, ultraviolet light and inert gas blanketing.

Hazardous Decomposition Products: Carbon oxides.

Hazardous Polymerization: May occur.
