▶ [Click here for more details on the MicroCare Sticklers™ Pro360™ Benchtop Stand](#)

An industry first portable device that incorporates best-in-class benefits to spray a high purity solvent onto an end face for non-contact cleaning. The spray is followed by an air burst causing a Coandă effect allowing the process to clean 360° of the ferrule end face surface to the edge.

**Product Features:**

- Touchless cleaning eliminates static and scratching
- Full end face 360° clean prevents migratory residues and particulate from getting near the core
- One device with tips cleans various connector sizes including 1.25mm, 2.5mm, and MPO/MTP
- One activation delivers a micro-dose of atomized cleaning fluid inside a narrow column of pressurized air onto a fiber optic connector end face to the ferrule edge
- Easy activation reduces technician fatigue
- One cleaning tool for a host of fiber cleaning applications
- One compact device for field portability (battery) or AC line-powered for in-house, high-volume use

*Multiple US and International Patents Pending*
