Micro-Dot™ Manual Syringe Dispenser

- Simple, manual operation that requires no electric or air
- Positive-displacement dispensing with adjustable stroke
- Control over dispense volume, assuring an accurate dispense despite viscosity and syringe level changes
- Dispenses a wide range of low-to-high viscosity materials
- Portable; can be used anytime, anywhere
- Utilizes disposable syringe as fluid reservoir for easy product changeover
- Dispensers design eliminates the risk of material contamination during dispense
- Compatible with 3, 5, and 10 mL machine-ready syringes
- Available with thumb or lever actuation

The Micro-Dot™ portable syringe dispenser offers positive-displacement accuracy for dispense volumes as small as 0.0003 mL. Once a volume is set it can be repeated with accuracy. This syringe dispenser utilizes a pre-packaged disposable syringe as its fluid reservoir, preventing any contact between the fluids and the dispenser eliminating fluid contamination during dispense. With the proper dispense tip selection, the Micro-Dot is suitable for dispensing a wide range of low-to-high viscosity fluids including pastes, lubricants, adhesives, sealants, and more.
