TS350 Series Dispenser

Advanced-Level Digital Dispenser

The TS350 Series Dispenser dispenses low, medium and high The user friendly firmware provides an option of programming viscosity fluids, accurately and consistently.

system, coupled with a digital timing circuit and digital pressure/vacuum read out, provides repeatable fluid dispensing.

These systems are economical, highly accurate and repeatable micro air dispensing systems.

The TS350 Series includes a digital timer, with rotary timing knob, for easy setup and a vacuum control for all viscosities of for specific low viscosity applications. fluid.

up to 10 varied, sequenced or individual shots.

A highly responsive air pressure and vacuum management. The TS350 Series has 4 modes of operation: Timed, Teach, Interrupt and Purge.

> The rear DB9 interface connector has the ability to initiate the dispense cycle by an external device by way of voltage or contact closure signal.

> Available in two versions of operating pressure: 0 to 100 psi (0 to 6.9bar) for general applications and 0 to 15 psi (0 to 1.0bar)
